

//Day 11 coding Statement: Write a program to find Fibonacci series up to n

```
package vowel;
```

```
import java.util.*;
```

```
public class Vowel {
```

```
    public static void main(String[] args) {
```

```
        Scanner sc=new Scanner(System.in);
```

```
        System.out.println("Enter number for fibonacci series:");
```

```
        int a=sc.nextInt();
```

```
        int n1=0;
```

```
        int n2=1,sum=0;
```

```
        System.out.print("0,1");
```

```
        for(int i=2;i<a;i++){
```

```
            sum=n1+n2;
```

```
            n1=n2;
```

```
            n2=sum;
```

```
            System.out.print(", "+sum);
```

```
        }
```

```
        System.out.println("\n");
```

```
    }
```

```
}
```
