

//ay 14 coding Statement : Write a program to reverse a given number

```
package vowel;
```

```
import java.util.*;
```

```
public class Vowel {
```

```
    public static void main(String[] args) {
```

```
        Scanner sc=new Scanner(System.in);
```

```
        System.out.println("Enter number:");
```

```
        int n=sc.nextInt();
```

```
        int rev=0;
```

```
        int temp;
```

```
        while(n!=0){
```

```
            temp=n%10;
```

```
            rev=rev*10+temp;
```

```
            n=n/10;
```

```
        }
```

```
        System.out.println(rev);
```

```
    }
```

```
}
```
