

//Day 27 coding Statement : Write a program to find the double of the given number without using arithmetic operator

```
package vowel;  
import java.util.*;
```

```
public class Vowel {
```

```
    public static void main(String[] args) {
```

```
        Scanner sc=new Scanner(System.in);  
        System.out.println("Enter number:");  
        int n=sc.nextInt();  
        int c=n;  
        int res=0;  
        for(int i=1;i<=n;i++){  
            if(i==n){  
                res=c+n;  
            }  
        }  
    }
```

```
        System.out.println(res);
```

```
}}
```
