

//Day 29 coding Statement : Write a Program to concatenate a string.

```
package vowel;
```

```
import java.util.*;
```

```
public class Vowel {
```

```
    public static void main(String[] args) {
```

```
        Scanner sc=new Scanner(System.in);
```

```
        System.out.println("Enter String1:");
```

```
        String str1=sc.next();
```

```
        System.out.println("Enter String2:");
```

```
        String str2=sc.next();
```

```
        String se=str1.concat(str2);
```

```
        System.out.println(se);
```

```
    }}
```
